GMSI Certification Awarded to the Patriot RPM Series Mobile Radios

Carmel, IN – The Patriot RPM Series Mobile Radios have recently been awarded a GMSI certification as compatible for use with the GMSI Status 1 Driver Workstations. This MDT4122 was specifically designed for fleet management and communications systems in the target, taxi, paratransit, and transit industries.

The Patriot RPM Series Mobile Radios utilizes the latest in state-of-the-art electronic design and manufacturing technology to provide low cost and high performance. These full-featured 16 channel mobile radios are PC field programmable for simplex, half-duplex, or receive only operation that provides greater flexibility by enabling operation within several different radio systems. Other features include: wide band operation, cloning capability, 63 Paging Quiet Call codes, Normal and/or Priority scan, CTCSS, Digital Coded Squelch, Two-Tone Sequential Decode, Busy Channel Lock-Out, Channel Monitor Lock-Out, and Transmitter Time-Out Timer.

To ensure years of reliable service the RPM Series (VHF and UHF models only) are MIL-STD 810 C & D certified for shock and vibration.

Ritron Inc. manufactures a complete line of Land Mobile Radio (LMR) products and accessories for worldwide distribution. All Ritron® products are proudly designed, made, and serviced in the USA. For more information about Ritron® call (800) USA-1-USA or visit the company web site at www.ritron.com.
