New Jobcom Display-Series Wireless Intercom/Base Station/Mobile *Features "Z" Button Soft Key and 10 Ch.*

Carmel, IN – RITRON, Inc. introduces the new Jobcom Display-Series Wireless Intercom/Base Station Radio. These VHF/UHF full feature radios have 2.5 Watts of power output, up to 10 channel capability, high visibility, easy-to-read LED display, CTCSS or Digital Coded Squelch, Two-Tone Paging Encode and Decode, DTMF ANI Encode, Call Tone, Channel Scan, High Volume, Easy-To-Hear, Audio Output and 110VAC or 12VDC operation.

The Base Stations rugged, all metal housing is compact in size (1.4"x3.8"x5.6") and fits easily on any surface. Each Display-Series base can be tailored precisely for the user's specific needs. For example, each radio can be programmed to display as few as 1 or as many as 10 channels. The display base radio is the perfect wireless solution for virtually any two-way radio system where a radio needs to be stationed permanently at a receptionist position, plant foreman office, service desk, school administration office or any other dispatch point. The unit can be permanently mounted to a wall, desk or a vehicle; such as, a forklift truck with the optional bracket.

The Display-Series base radios are field programmable to any of 21 different color dot/star frequencies and PC programmable to any frequency within the VHF or UHF band. A programmable soft-key called the "Z" button, can be assigned to one of several different functions such as; Call Tone, Encode a Specific DTMF ANI String/Per Channel, Encode Two-Tone Paging, Channel Scan (Normal and/or Priority), Weather Scan, Channel Monitor, Talk-Around.

Other PC programmable features include: narrow or wide band selectable (TX only), Busy Channel Lock-out. The VHF models feature NOAA Weather Channel scan and NOAA Weather Alert allowing them to serve as both a NOAA Weather monitor radio and as a two-way base station radio. Versatile audio accessory jacks allow the use of optional remote speaker microphone, headsets, or earsets.

The Jobcom Display-Series intercom/base radios utilize the latest in surface mount design and microprocessor design technology to provide a low cost, high performance, ultra small, dependable portable radio. The Jobcom Display-Series base radios come with an antenna, wall transformer and one-year warranty. Designed and manufactured in the USA.
