# Ritron LoudMouth™ Wireless PA System

## *When hard-wiring installation is not practical*

**Carmel, Indiana** – The LoudMouth™ Wireless PA System is the ideal solution where a hard-wired PA installation is simply impossible, too expensive, or temporary. The LoudMouth™ allows you to use your portable 2-way radio, base station or mobile radio to deliver live voice messages directly to a PA speaker up to 2 miles away. Professional grade wireless communication... Keeping People Connected!

The system consists of a 1 channel VHF or UHF radio receiver with 8 Watt audio amplifier, BNC flex antenna, flush-mount wall bracket, a rechargeable emergency back-up battery, a 110 VAC power supply, and a separate indoor/outdoor PA horn/speaker with 25 feet cable that attaches to the receiver. The receiver and PA are activated by the 2-way radio. The radio serves as a microphone and allows “live” voice messages to be delivered to the PA speaker from long-range i.e. across the factory floor or from across a parking lot.

The LoudMouth™ Wireless PA System is ideal for Schools, Hotels, Factories, Office Buildings, Hospitals, Airports, Marinas, Country Clubs Warehouses, Lumber Yards, Parking Lots, Construction Sites, Amusement Parks, Golf Courses, Special Events and Sporting Events

Made in the USA, the Ritron LoudMouth™ Wireless PA System is part of a complete line of wireless security solutions. Ritron manufactures Land Mobile Radio (LMR) products and accessories for worldwide distribution.
