Quick Talk OutPost™ Self-contained Wireless Callbox System

Carmel, IN – Ritron, Inc. Introduces the Quick Talk OutPost™ Callbox that provides low-cost VHF/UHF 2-way wireless communications at fixed locations. The OutPost™ is ideal for use in buildings, schools, hospitals, agribusiness, delivery/receiving docks, golf courses, amusement parks, parking structures/lots, gates, or as a helpbox.

The Quick Talk OutPost™ Callbox may be used on any existing 2-way radio system without costly upgrades or capital expenditures. The compact size (6.25" X 6.25" X 4.38") of the OutPost™ with its weather and impact resistant enclosure and sealed push button allows deployment in areas where you need it most, even outdoors; and since it is wireless and battery-operated (6 D alkaline batteries), installation or relocation is easily accomplished. Coverage of the OutPost™ is up to 8 floors (150,000 sq ft) in multi-level buildings and has a range of up to 4 miles. Optional tamper-resistant cover and magnetic mount antenna, for increased range and coverage, are available.

Programmable and synthesized, the 1 channel, 1 Watt OutPost™ is currently available in Wide (25 kHz) bandwidth version. A Narrow-band (12.5 kHz) is forthcoming. Other features include loud and clear audio output and built-in 51 Quiet Call (QC) tones. The Quick Talk OutPost™ is available in Conventional as well as Trunking (LTR and PassPort protocols) versions.

The Quick Talk OutPost™ is part of a complete line of wireless products for businesses. Ritron Inc. manufactures Land Mobile Radio (LMR) products and accessories for worldwide distribution. All Ritron products are proudly designed, made, and serviced in the USA. For more information about Ritron call (800) USA-1-USA or visit the company web site at www.ritron.com.
