Long Range Wireless Voice Communication and Gate Control

Carmel, IN – Ritron, Inc. announces an innovation in gate communication, access, and activation, the Outpost™ 2-way radio callbox with GateGuard™ option. The added security and convenience of wireless remote control will put an end to uninvited visitors, vandals, and other potential security risks.

The OutPost wireless callbox with GateGuard offers an efficient method to provide 2-way voice communication between visitors and your radio equipped personnel. Now your personnel can control access to your facility by identifying visitors before access is permitted.

Since the OutPost is battery-operated* it is the perfect solution for unattended gates, gasoline tank farms, manufacturing plants, water treatment facilities, estates/farms/ranches, golf courses, schools, parking lots, and restricted areas. This product will also eliminate monthly phone line bills, limit hardwire and trenching costs, and simplify installation.

The OutPost with GateGuard option at an unattended gate allows for 2-way communications and gate activation by a centralized dispatch area, or by an on-site employee using a handheld portable radio. For centralized areas the stationary desktop AC-powered Base Station is recommended. The Base Station 2-way radio used with the OutPost permits inside monitoring, 2-way communications and gate activation. The Base Station simply plugs in the wall and it is “on” 24/7. If there is an employee within earshot, your OutPost is being monitored. For personnel on the move, any handheld portable 2-way radio programmed with a series of DTMF access numbers or equipped with a DTMF keypad is sufficient. The radios will give anyone the ability to communicate, monitor, and provide access for up to 9 different gates.

If you need cost-effective wireless security solutions, then call us today at 800-USA-1-USA, Fax: 317-846-4978, Email: sales@ritron.com or write P.O. BOX 1998, Carmel, IN 46082, Attn: GateGuard.

The OutPost with GateGuard option is part of a complete line of wireless products and systems for businesses. Ritron manufactures Land Mobile Radio (LMR) products and accessories for worldwide distribution.

All Ritron products are designed, manufactured, and serviced in the U.S.A.

* An AC power option is also available.
